## ECOSYSTEMS

---

### *Welcome to our latest menu – Ecösystems Vol.2*

*All types of ecosystems fall into one of two main categories: Terrestrial or Aquatic. With the five major groups being Forests, Grasslands, Deserts, Tundra, Freshwater and Marine.*

*Ecosystems are very sensitive to change. The living and non-living components of these ecosystems can be altered at any time, by either natural factors or human intervention.*

*In this menu, we have dedicated a section to **Grasslands and Forests**, focusing on products and elements that come from these green and rural areas.*

*The **Freshwater and Marine** section, highlights the richness of the UK's marine ecosystems, with it's wide diversity of underwater habitats and species that flourish in and around these water sources.*

*Our **Towns and Cities** section covers the special connection we have with our home city.*

*London is one of the greenest cities in the world and through urban foraging and waste solutions with neighboring businesses. Each of the drinks we have created contain ingredients and elements that have either been re-used or those which society tells us are past their best and for the most part, are discarded without a second thought.*

*Finally, our small list of **bottled classics** are done 'Öur Way'. These classics are made by adopting the same practices of our main cocktail menu, but are bottled for year-round for enjoyment.*

*Due to changes in micro seasons, drinks will come and go.  
So get them whilst you can...*

## ECOSYSTEM // TOWNS / CITIES

*The below drinks use ingredients foraged within London. Championing not only locally foraged ingredients from the green spaces around us but using ingredients that are considered past their best or wasted without consideration. In and around the surrounding areas of Hackney you will see a bounty of produce just growing on the street. Stop and breath in this magical city.*

---

# TOWNS / CITIES

---

## ECOSYSTEM // FRESH WATER / MARINE

*Our seas give us vital goods and services including healthy, secure food supplies and our transport routes. They also help to regulate our climate and give millions of people the chance to enjoy the natural environment. Our small island is surrounded by a wealth of water. This section explores ingredients that flourish in or near our shoreline, as well as our freshwater streams.*

---

### ALL DRINKS £10.50
